# TIMBERCARD

THE PAYMENT CARD FOR  
A SUSTAINABLE LIFESTYLE

# CAPTURE THE ATTENTION OF HIGH-VALUE CONSUMERS

Billions of plastic cards are produced each year for financial services and other purposes. That makes it difficult for Banks to offer payment cards that stand out and capture the attention of consumers.

TIMBERCARD® is the world's first card body made purely of wood. It has been awarded the highest possible grade in the flustix LESS PLASTICS | PRODUCT certification and meets the definition of being 100% plastic-free according to the EU Single-Use Plastics Directive.

Unlike common plastic cards, TIMBERCARD is biodegradable and can even be composted at home. It's the perfect centerpiece for card programs targeting high-value consumers who seek a sustainable lifestyle.

After six to twelve months of natural soil exposure and microbial activity, the biological elements of TIMBERCARD are in advanced stages of complete decomposition.

## DESIGNED FOR BANKS THAT LEAD

Banks can make a powerful statement about their commitment to ESG while attracting high-spending customers with a passion for sustainability.

Imagine your Bank's brand beautifully laser-engraved into a card body made of fully biodegradable layers of pure wood.

Approved by Visa and Mastercard as well as the highest flustix LESS PLASTICS | PRODUCT accreditation.

Certified to the latest international payment card industry standards.

Wood sourced from sustainable and FSC-certified forests in Europe.

NFC and magnetic stripe options for contact and contactless payment.

Sustainability in every detail from bio-adhesives used for bonding wooden layers, to an antenna inlay made of FSC-certified paper.

Tough and scratch-resistant card surface with industry-standard lifespan under normal usage conditions.

Hot stamping of security holograms available.

Every card is unique with an unforgettable look and feel making every payment an experience for your customers.

## MEMORABLE

The unforgettable look and feel of pure wood gives consumers a reason to remember and choose your card program.

## REMARKABLE

Stimulates conversations about innovation, ethics and your brand.

## SUSTAINABLE

Each detail of TIMBERCARD is sustainable including wood sourced from FSC-certified forests to the bio-adhesives used in the production process.

DO GOOD USE WOOD
